## FEATURES

eTrex 10 retains the core functionality, rugged construction, affordability and long battery life that made eTrex the most dependable GPS device available. We improved the user interface and added a worldwide basemap, paperless geocaching and support for spine-mounting accessories.

### See the Way

eTrex 10 has an enhanced 2.2in monochrome display that's easy to read in any lighting situation. Both durable and waterproof, eTrex 10 is built to withstand the elements. Its easy-to-use interface means you'll spend more time enjoying the outdoors and less time searching for information. eTrex 10 features the legendary toughness that's built to withstand the elements. Dust, dirt, humidity, water — none are a match for this navigator.

### Find Fun

eTrex 10 supports geocaching GPX files for transferring geocaches. Visit [OpenCaching](#) to start your geocaching adventure. By going paperless, you're not only helping the environment but also improving efficiency. eTrex 10 stores and displays key information, including location, terrain, difficulty, hints and descriptions, which means no more manually entering coordinates and paper printouts. Simply upload the GPX file to your eTrex 10 and start hunting for caches.

### Keep Your Fix

With its high-sensitivity, WAAS-enabled GPS receiver and HotFix satellite prediction, eTrex 10 locates your position quickly and precisely and maintains its GPS location even in heavy cover and deep canyons. Whether you're in deep woods or just near tall buildings and trees, you can count on eTrex 10 to help you find your way when you need it the most.

### Go Global

eTrex devices are the first-ever consumer-grade receivers that can track both GPS and GLONASS satellites simultaneously. When using GLONASS satellites, the time it takes for the receiver to "lock on" to a position is (on average) approximately 20 percent faster than using GPS. And when using both GPS and GLONASS, the receiver has the ability to lock on to 24 more satellites than using GPS alone.

### Paperless Geocaching

Spend more time in the field and less time fumbling with paper. The eTrex stores and displays key information, including location, terrain, difficulty, hints and descriptions, which means no more manually entering coordinates and paper print outs. Simply upload the geocaching GPX file to your device and start hunting for caches.

### Track More Satellites

Find your way with the first consumer-grade GPS receiver that tracks both GPS and GLONASS satellites simultaneously. When using them together, the receiver has the ability to lock on to 24 more satellites than using GPS alone, giving you your position quickly.

## User-friendly Layout

Skip the confusion about how to find things. eTrex is easy to use with intuitive navigation screens.

## Pick Your Profile

Customize eTrex for every occasion. Profiles allow eTrex to quickly switch into different configurations that you create, so when you're done geocaching and you need to drive home, your eTrex won't miss a beat.

## More Dashboards in More Places

Bring more functionality into frequently used applications with personalized dashboards. Avoid switching between applications and display more information by customizing your dashboards with an altimeter, compass, configurable data fields and more.

## Advanced Tracking

Whether following a saved route or planning a new one, eTrex has the tracking features you need. See high and low elevation points or store waypoints along a track (start, finish and high/low altitude) to estimate time and distance between points.

## eTrex Quality

- eTrex stores data in universally accepted GPX file format so its compatible with a variety of computer applications (best when used with BaseCamp).
- Includes a worldwide basemap, improved interface and added support for spine mounting.
- Withstands dust, dirt, humidity and water.
- Locates your position quickly and precisely, and maintains it even in heavy cover and deep canyons.

## Physical & Performance:

Unit dimensions, WxHxD :2.1in x 4.0in x 1.3in (5.4 x 10.3 x 3.3 cm)

Display size, WxH : 1.4in x 1.7in (3.6 x 4.3 cm); 2.2in diag (5.6 cm)

Display resolution, WxH : 128 x 160 pixels

Display type : transfective, monochrome

Weight : 5 oz (141.7 g) with batteries

Battery : 2 AA batteries (not included); NiMH or Lithium recommended

Battery life : 25 hours

Waterproof : yes (IPX7)

Floats : no

High-sensitivity receiver : yes

Interface : USB
